

Tarefa 1.2

```
public float factorial(byte n) throws Exception {
```

1

```
    if (n < 0) {
```

2

```
        throw new Exception("Error. El número tiene que ser >=0");
```

3

```
    }
```

```
    float resultado = 1;
```

4

```
    for (int i = 2; i <= n; i++) {
```

5

```
        resultado *= i;
```

6

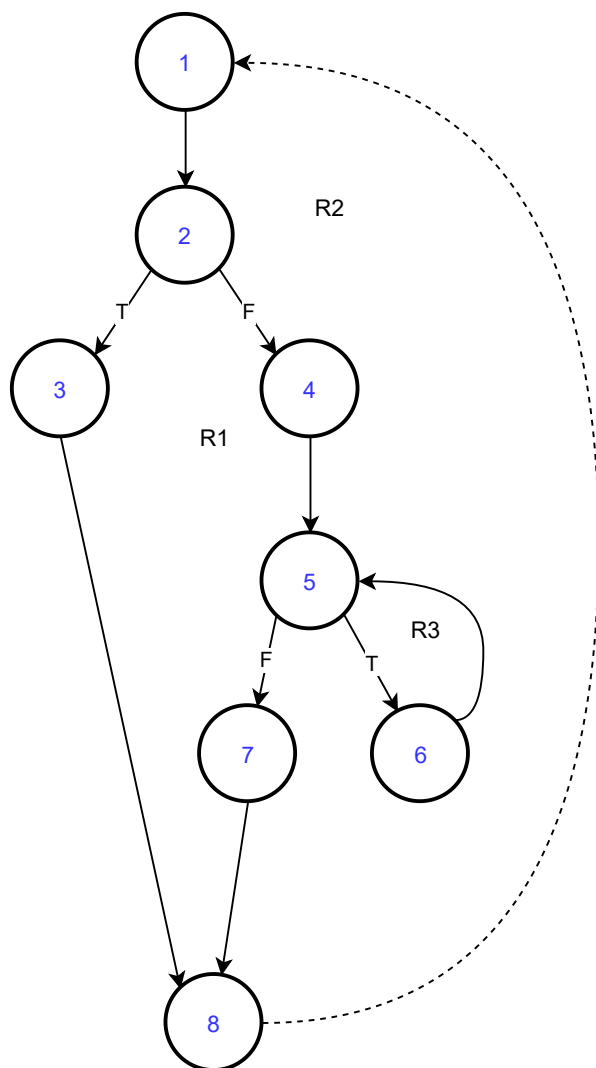

```
    }
```

```
    return resultado;
```

7

```
}
```

8

Complexidade

$$V(G)=a-n+2=9-8+2=3$$

$$V(G)=r=3$$

$$V(G)=c+1=2+1=3$$
